

## ESXi change MPIO RR and Adjusting Round Robin IOPS limit from default 1000 to 1

esxcli storage nmp device list

```
for i in `esxcfg-scsidevs -c |awk '{print $1}' | grep eui`; do
echo $i;
esxcli storage nmp device set --device $i --psp VMW_PSP_RR;
esxcli storage nmp psp roundrobin deviceconfig set --type=iops --iops=
1 --device=$i;
done
```
