

VMWARE

How to Mount Datastore Cloned Snapshot in VMware ESXi

```
[root@nodo1:~] esxcli storage vmfs snapshot list
```

```
59aec5fa-f1922cb0-98a9-0cc47a352258
```

```
Volume Name: Jovian_allvm
```

```
VMFS UUID: 59aec5fa-f1922cb0-98a9-0cc47a352258
```

```
Can mount: false
```

```
Reason for un-mountability: the original volume is still online
```

```
Can resignature: true
```

```
Reason for non-resignaturability:
```

```
Unresolved Extent Count: 1
```

```
[root@nodo1:~] esxcli storage vmfs snapshot resignature -u 59aec5fa-f1922cb0-98a9-0cc47a352258
```
